

Micro-Internships

A micro-internship is a short-term project that can be completed within 5-40 hours, typically due within a week to a month. These projects require no on-boarding and can be completed by a college student with minimal instruction. These are important but low-risk tasks that can be completed either on-site or remotely.

Work on **paid projects** that only require a short time commitment

Explore different career paths while **building your professional resume** and network

How It Works

1 Complete the Agile Work Profiler. Use the link below to access this tool.

2 Create a profile on Parker Dewey using the link below.

3 Add **Kansas Micro-Internship Program** to the **Affiliations** section of your Parker Dewey profile. This helps companies find you.

4 Apply for the project! If you are selected, you'll get an email from Parker Dewey.
